

Self-cleaning ropes Increase efficiency, maximize uptime

Increase efficiency, maximize uptime

Sandvik modular self-cleaning ropes provide you with a highly efficient solution to minimize blinding, clogging and pegging on screen decks, thereby further increasing the efficiency and uptime of your screening operation.

These packages are ideally suited to lower screen decks on QE scalper products, and middle and lower decks on QA screen products. Each flexible rope is anchored to the underside of the preceding screen deck.

They require no energy to operate, instead utilize the screens movement, bouncing and vibrating on top of the screen deck helping to alleviate blinding, clogging and pegging.

Features

- Minimize blinding, clogging and pegging
- Increase efficiency and uptime of your operation
- They are best suited for products featuring flexible self-cleaning type mesh panels.
- Self-contained modular kits that are easy to install

The self-cleaning ropes consists of a combination of five modular elements:

- A mount
- Fixed rope
- Floating 3-way junction
- Connector weights
- Separators

The number of ropes and elements required is determined by the width and length of the screen deck.

Kits are available to purchase as packages for all current QE scalper and QA screen models, as well as their preceding models.

Model	Part Number	Quantity
QA442 / QA441 / QA440 / S6	AFMK0082	1
QA452 / QA451 / QA450 / S7	AFMK0082	2
QA335 / S4	AFMK0083	1
QE442 / QE441 / QE440	AFKM0086	1
QE342 / QE341 / QE340 / E7	AFMK0085	1
QE241	AFKM0084	1
HS323 / HS322 / DDHS QA335	AFMK0087	1
